# *Plexia Patient Portal*

## *— Keep your practice one step ahead.*

With the Patient Portal comes a whole new way of interacting with your patients. The Patient Portal is a secured web-site that Plexia creates for your patients to log into. It provides an opportunity for patients to review, submit & fill out forms on their own before coming in for their appointment.

## *— Acquiring patient's information is easier than ever.*

**Efficient.** Patients can fill in forms electronically in your clinic prior to seeing you.

**Time Saving.** Reduces staff time to collect information from patients.

**Convenient.** Tablet and smartphone friendly. Could be done at home (with help from others) or at the clinic (eg. while waiting for appointment).

**Environmentally Friendly.** Eliminates paper usage for forms.

**Secure.** A controlled environment where patients only have access to the forms, not their chart.

**Flexible.** Choose to invite patients to your Patient Portal or have it open to everybody.

**Smart.** Answers from their submission can be inserted into your consult/follow-up letter or patient's chart (problems, allergies, surgeries or medications).

## *— Future enhancements*

- A.** Ability to have patients submit answers on a periodic basis for you to review their medical progress.
- B.** Ability for patients to book their own appointments (Patient Online Booking). Additional setup and monthly fees will apply.

# Get Started

*Contact Plexia to setup your Patient Portal.*

## — Setup fees

**\$100** / physician

*Configuration and integration of  
Patient Portal to your EMR.*

**\$100** / hr

*Customization of forms.*
