

Do you know how to

Access your EMR Backup Site?

<https://backup.plexia.ca/plexiabackup>

The screenshot shows the Plexia Backup System interface. At the top, the Plexia logo is displayed with the text "plexia electronic medical systems inc." and "BACKUP SYSTEM". Below the logo, the text "- READ ONLY -" is shown in red. A "Status:" section contains a table with the following content:

Date	Plexia Bulletin
Aug 29, 2011	Dear users, this is the backup site. Please note that it is available for READ ONLY purposes until your main EMR project is back up. Thank you. Plexia Admin

Below the status section, there is a "Login:" section with a "Username:" label, an input field, and a "Go" button.

Enter your **Username** and click **Go**
Click your backup site link

Note the following when using your EMR Backup Site:

- ☑ Read-Only access – information can be read, but not added or edited
- ☑ Any new patient data should be written on paper and entered into your EMR when access to your main site returns
- ☑ The data is current to the last backup, which is one day prior

For further inquiries, contact Plexia Support at 604-269-3733
